Preface xv

Quotation—"Mind Setting" xviii

<b>1. Concepts and Approaches of Value Analysis and Engineering</b> .....	<b>1</b>
1-1 Coaching of Champions Concept	1
1-2 Problem-solving System	2
CASE STUDY—The Red Pointer and Red Ink	2
Four Separate Kinds of Thinking	4
Procedures to Locate Unestablished Problems	4
1-3 What is Value?	4
Maximum Value	5
Normal Degree of Value	5
1-4 Importance of Value	5
CASE STUDY—Conduct Electric Current in Steel?	6
1-5 Why Now?—Better Solutions to Value (Cost) Problems	7
Cycle of the History of a Product	7
1-6 Value-oriented Work	9
Use of Value Resources	9
Value Work Expands Markets and Jobs	10

	Elimination of Human Toil	10
	Adequate Defense for Lower Cost	11
1-7	Considerations for Improving Value	11
	Effect of Time Shortage	11
	Lack of Measurement in Value Work	11
	CASE STUDY—Dealing with Time and Value	12
	Human Factors	13
	Impact of New Processes, Products, and Materials	13
	Timing for Value Work	14
1-8	System Must Locate Unsuspected Areas Responsible for the Higher Costs	14
	1. Management Organization	14
	2. Marketing Concept—Customer Functional Understanding	14
	3. Engineering Concept or Approach	15
	4. Engineering Detail	15
	5. Manufacturing Concept or Approach	15
	6. Manufacturing Operation	15
	7. Purchasing or Materials Procurement Work	15
	No Reduction in Quality, Safety Features, or Attractiveness	17
1-9	System Must Locate and Deal with Unsuspected Stoppers	17
1-10	The Approach (Oversimplified) to Prepare the Mind for the Value Analysis Technique	18
	CASE STUDY—Value Analysis Techniques Certainly Cannot Improve the Value of 10,000 Bolts!	20
	The Planned Approach	21
	SUMMARY	24

## **2. All Cost Is for Function . . . . . 25**

2-1	Customer Wants Use and Aesthetic Functions	25
2-2	Identify, Clarify, and Name Functions	26
	CASE STUDY—\$50,000 for Concrete—What Is the Function?	26
2-3	Quantify Functions When Practicable	27
2-4	Unify the Function and Its Specifications	28
2-5	Analyze Aesthetic Functions	28
2-6	Classify Functions As Either Basic or Secondary	29
	SUMMARY	29

## **3. Evaluate the Function . . . . . 31**

3-1	Evaluation of Function	31
3-2	Evaluation of Functions by Comparison	32
	CASE STUDY—Evaluate a Single Function	32
	CASE STUDY—Evaluate Three Functions	33
3-3	Evaluation of Interacting Functions	35
	CASE STUDY—Interacting Functions	36
3-4	Evaluation of Functions (from Available Data)	38
	CASE STUDY—Published Data Used to Evaluate the Function	38
3-5	Evaluate All Functions by Comparison	40
3-6	Value of Function Becomes a Guide or Measure	42
	SUMMARY	44

<b>4. Problem-setting System</b> .....	<b>45</b>
4-1 Step 1: Identify Functions	45
4-2 Step 2: Separate Functions	46
4-3 Step 3: Group Functions	47
CASE STUDY—Problem Setting	48
4-4 Problem-setting and Problem-solving Overlap	50
SUMMARY	50
<b>5. Problem-solving System</b> .....	<b>51</b>
5-1 A Good System Contains Everything the Task Requires	51
5-2 Essential Preliminary Step Is "Mind Tuning"	53
5-3 The Value Analysis Job Plan	53
1: Information Step	54
2: Analysis Step	55
CASE STUDY—Evaluating Function in Analysis Step Results in	
Reducing Manufacturing Cost 75 Per Cent	56
3: Creativity Step	56
CASE STUDY—Creativity Step Reduces Cost of Shift-lever Bracket	
80 Per Cent	57
4: Judgment Step	58
5: Development Planning Step	58
CASE STUDY—A Silver Contact Assembly—Treatment under the	
Value Analysis Job Plan	59
CASE STUDY—The Pivot Pin—Depth and Thoroughness Required	63
5-4 Utilize Good Guidance from the Past	66
5-5 Manager Guidance Points in the Job Plan	67
SUMMARY	68
<b>6. Setting and Solving Management-decision-type Problems</b> .	<b>70</b>
6-1 Some Types of Management Problems	70
6-2 Setting the Precise Problem To Be Solved	71
CASE STUDY (with Detailed Information Concerning the Problem	
Setting)—Problem: Now That a Product Was Proved and the Market	
Was Established and Growing, Should a Company Build Manu-	
facturing Facilities for an Important Purchased Assembly?	72
6-3 Some Management Problems for Deepening Familiarity with	
Techniques	74
SUMMARY	75
<b>7. Setting and Solving Services Problems</b> .....	<b>77</b>
7-1 Some Typical Service-type Problems	77
7-2 Patterns for Disciplined Thinking of Value Analysis on Services	
Work	78
CASE STUDY—Value Analysis Applied to Hospital Services and	
Expenses	78
7-3 Progression of Value Analysis Work on Services	82
7-4 Start of Value Analysis Program in a City Government	82
Steps Taken	83

Typical Findings of City Employee Teams during Their Value  
 Analysis Training Project Work 83  
 CASE STUDY—Value Analysis of a Community Service 84  
 SUMMARY 86

**8. Results Accelerators . . . . . 87**

8-1 Avoid Generalities 88  
 CASE STUDY—Develop Specific Information 91  
 CASE STUDY—Crystal or Window Glass 92  
 8-2 Get All Available Costs 93  
 CASE STUDY—Unmeaningful Costs Used for Decision Making  
 Bankrupt the Business 98  
 8-3 Use Information from Only the Best Source 99  
 CASE STUDY—There Is Only One Supplier 101  
 8-4 Blast, Create, Refine 102  
 Nail 104  
 Screw 104  
 Bolt 105  
 CASE STUDY—The Electric Controller 111  
 8-5 Use Real Creativity 113  
 8-6 Identify and Overcome Roadblocks 116  
 CASE STUDY—It Won't Work 119  
 CASE STUDY—Underwriters' Won't Allow It 120  
 8-7 Use Industry Specialists to Extend Specialized Knowledge 121  
 CASE STUDY—Do It Like an Indian 122  
 8-8 Get a Dollar Sign on Key Tolerances 125  
 CASE STUDY—Is the Value \$60 per Thousand, or is it \$1 per  
 Thousand? 126  
 8-9 Utilize Vendors' Available Functional Products 130  
 CASE STUDY—Specialty Product Simplified It 132  
 8-10 Utilize and Pay for Vendors' Skill and Knowledge 141  
 CASE STUDY—The Three Springs 142  
 8-11 Utilize Specialty Processes 146  
 CASE STUDY—Mounting Holes for Perforated Sheet 148  
 CASE STUDY—The Temperature-sensitive Control 151  
 8-12 Utilize Applicable Standards 152  
 CASE STUDY—Standardize the Packing? 155  
 8-13 Use the Criterion, "Would I Spend My Money This Way?" 155  
 SUMMARY 161

**9. Using the System . . . . . 162**

9-1 Three Basic Steps 163  
 9-2 Example of Procedure 163  
 Basic Step 1: Identify the Function 164  
 Basic Step 2: Evaluate the Function by Comparison 164  
 Basic Step 3: Cause Value Alternatives to Be Developed 165  
 9-3 Interrelation of Basic Steps, Job Plan Steps, and Results-  
 accelerating Techniques 167  
 Basic Step 1: Identify the Function 168  
 Basic Step 2: Evaluate the Function by Comparison 169

Basic Step 3: Cause Value Alternatives to Be Developed 169  
 9-4 Examples of Appropriate Progression 170  
 9-5 Examples Dealing with "Generality" Stoppers 174  
 SUMMARY 176

**10. Special Knowledge Required . . . . . 178**

10-1 Reach of Knowledge 179  
 10-2 Nature of Knowledge 179  
 CASE STUDY—The Timer 180  
 10-3 Form and Constitution of Knowledge Fund 182  
 10-4 Listing of Specialized Competence 184  
 10-5 Specific Product and Process Knowledge 187  
 10-6 Relative Cost Knowledge 197  
 SUMMARY 203

**11. Understanding the Decision Environment . . . . . 205**

11-1 Decision Environment Requires Vast Consideration 206  
 11-2 Decision Makers Must Cause Change and Accept Personal Risk 206  
 Injury to Decision Makers Is Real 207  
 Embarrassment Injures Decision Makers 208  
 11-3 Unwelcome Decisions Required or Extra Cost Results 208  
 Decision Based on "Sound General Criteria" That Do Not Fit the Specific 208  
 Decisions Based on "Traditional Criteria for the Area" That Do Not Fit the Specific 208  
 Decisions Based on What the Decision Maker in Error Believes to Be the "Policy, Practice, or Wish" of Superiors 209  
 Decisions That Become Routine Because They Seem to Be in Harmony with Similar Actions in That Area 209  
 Lack of a System to Secure Available Pertinent Information Before Certain Classes of Decisions Are Made 210  
 Decisions Based on "What We Normally Want to Do" 210  
 11-4 Environment Is Always Subjective, but Objective Decisions Are Needed 210  
 Subjective Coloring Obscures Objective Situation 210  
 Decisions Vital to Profitability Are Often Made by Those Accountable for Quantities or Performance But Not for Profitability 211  
 Obscure Cause-and-Effect Relationship Allows Decisions Injuring Value 211  
 Feelings Always Influence and Often Control Decisions 212  
 Environment Is Hazardous to the "New" 213  
 11-5 An Environment Abhors Change 214  
 It is Comfortable to Avoid Embarrassment 215  
 11-6 Minimizing the Risk of Personal Loss 215  
 11-7 The Incredible Reality 218  
 CASE STUDY—Danger of Embarrassment Is More Forceful than Restored Market Volume 219  
 CASE STUDY—Fear of Embarrassment Is More Forceful in Decision Making than Ending Company Loss 219

	CASE STUDY—Fear of Embarrassment Is More Forceful in Decision Making Than a Profit on the Job	220
11-8	“What Managers Believe” Is the Master Key	221
	Management Beliefs that Support Competitive Value Decisions	222
	SUMMARY	223
<b>12.</b>	<b><i>Effect on Other Work in the Business</i></b>	<b>224</b>
12-1	Accounting	224
12-2	Appearance Design	229
12-3	Cost-reduction Activities	230
	Cost Reduction versus Value Analysis	231
	CASE STUDY—Increased Dollar Yield per Man-hour for Cost-reduction Work	232
12-4	Engineering	232
	CASE STUDY—Can We Scrap the Scrap?	235
12-5	Manufacturing	236
	CASE STUDY—Did the Vendor Contribute?	237
12-6	Management	239
	CASE STUDY—The Contacts That Were Lost	239
12-7	Purchasing	241
	CASE STUDY—It’s Patented	241
	Purchasing Practices Pertinent to the Proper Relationship between Value Analysis, the Purchasing Function, and the Purchasing Man	244
12-8	Quality Control	247
	CASE STUDY—Lower Costs May Mean “Doing It the Right Way”	248
12-9	Marketing	249
	SUMMARY	250
<b>13.</b>	<b><i>Effective Organization for Value Work</i></b>	<b>253</b>
13-1	Smallest and Smaller Businesses	255
13-2	One-man Setup	256
13-3	Two-man Setup	256
13-4	Three-man Setup	257
13-5	Four or More Consultants	257
13-6	Structuring	258
	The Company President’s Quotation	259
13-7	Integration of Research and Development with Emphasis on Military Contracts	261
	Benefits from Available Knowledge Sooner	261
	Decision Criteria—Performance and Time	262
	Decision Criteria—Performance, Time, and Cost	262
	Understanding the Research and Development Problem	262
	Research and Development Problem Solution	263
	Better Research and Development Answers Sooner	264
	SUMMARY	266
<b>14.</b>	<b><i>Essential Qualifications and Training for Value Analysts and Engineers</i></b>	<b>267</b>
14-1	Qualifications	267

- 14-2 Traits, Characteristics, and Experience 268
  - Knowledge 268
  - Imagination 268
  - High Degree of Initiative 268
  - Self-organization 269
  - Personality 269
  - Cooperative Attitude 269
  - Experience 270
  - Belief in the Importance of Value 270
- An Understanding of the Management and Decision Process 271
- 14-3 Training 271
  - Five Essentials of Training 271
  - How Much Training 271
  - An Effective 40-hour Training Seminar 272
- SUMMARY 273

**15. *Work Content for the Value Analyst, Engineer, and Consultant* . . . . . 274**

- 15-1 Indoctrination of Management 274
- 15-2 Integration 275
- 15-3 Value Appraisal and Product or Service Evaluation 275
- 15-4 Value Consultation 276
- 15-5 Value Training 277
- 15-6 Application to Various Business Activities 278
  - Sales 278
  - Engineering 279
  - Manufacturing 280
  - Purchasing 281
- SUMMARY 282

**16. *Motivation, Measurement, and Tests* . . . . . 283**

- 16-1 Motivation 283
  - The Business 283
  - Managers 284
  - Value Consultants and Others Using Value Analysis Techniques 285
  - Decision Makers 286
- 16-2 Measurement 287
  - Measurement of Organizations 287
  - Measurement of Value Work 292
- 16-3 Tests 294
  - Tests of Men 295
  - Tests of Work Being Done 296
- SUMMARY 298

**17. *Advanced Techniques* . . . . . 299**

- 17-1 Function Analysis System Technique (FAST) 299
  - How to Use FAST 300
  - FAST Diagram Cost Allocation 304
  - CASE STUDY—FAST Diagram Used; Parts Reduced from Nineteen to Four 304
- 17-2 Quantitative Evaluation of Ideas 305

<b>18. Using the System to Reduce Construction Costs . . . . .</b>	<b>313</b>
18-1 Definition for Construction Industry	313
18-2 Why So Much Unfunctioning Cost in the Construction Industry?	314
The Architects and Engineers	314
The Contractors	315
The Owners	315
18-3 How the Value Engineering System Is Being Used	316
Use the Functional Approach	316
Name and Evaluate Functions—Compare with Present or Planned Costs and Proceed with the Job Plan	317
18-4 How to Locate Areas Having Potential for Cost Improvement	319
18-5 When in the Life Cycle Is Value Engineering Most Productive	321
Started in Construction—Now Moving Back	323
18-6 Ending Nonproductive Nonproduction Costs	324
18-7 How Basic Obstacles Are Being Overcome	324
18-8 Where Effective Work Must Be Done	326
18-9 Some Factors That Require Search, Inputs, and Investigation	326
18-10 Some Typical Changes	328
18-11 Typical Summary Sheet—Work Based upon Final Design	329
<b>19. Problems for Assignment . . . . .</b>	<b>330</b>
19-1 Procedure for Using the Problems	330
19-2 Problems	331
<b>Appendix . . . . .</b>	<b>337</b>
A-1 Problem Solutions	337
A-2 Bibliography	340
A-3 Good “Make-or-Buy” Criteria—“CREEP”	341
<b>Index</b>	<b>351</b>
